

AT 2400 *Forms Cutter*

A high speed, high performance continuous forms cutter for demanding production environments.

- Sheets, slits and trims sprocket margins in one operation.
- Accurate, high speed cutting performance.
- Accepts single or multi part stock from 90mm to 520mm wide and up to 300 gsm.
- Capable of cutting strips out as small as 1/16" to discard or perforations.
- Internal Job Memory function.
- OMR Capability
- Output options include stack tray or Conveyor Stacker.
- An intuitive touch screen operator panel that includes on-screen parts catalogue and gives total control over all aspects of the machines functionality.

The **AT2400** high performance forms cutter surpasses the boundaries of continuous forms processing whilst improving the flexibility, accuracy and reliability demand by today's cheque printing applications. Rugged build quality with proven components designed for the hardest working production environments, the system can be integrated inline with various high speed continuous printers such as the Delphax range of impact encoders and the PS4050/PS4060 MICR systems or work off-line and handle the output from several printing systems.

A conveyor system (the **8300 conveyor/stacker**) is also available as an option which will convey individually cut cheques along a table for subsequent stitching or binding of books.

Performance (2 up single - cuts per hour):

Form Length (inches)	Forms Per Hour
3	85,680
4	77,280
8	57,240
10	51,482
12	46,080

Paper Format:

Paper Weight	40 -300 gsm
Form Width	90 - 520MM
Form Depth	1/16" - 166.5"
Margin Trim	10 - 25MM
Strip Cut	1/16" - 1.5"
